PROFILE

Computer Science undergraduate at FAST-NUCES and Software Engineer + SEO Expert at Dollar Tech. Ship and operate live products across ad-tech, SEO tooling, and content from a real-time bidding ad network serving 50M+ impressions/month to a suite of free web tools for creators.

EDUCATION

Bachelor of Science in Computer Science | FAST-NUCES (National University of Computer & Emerging Sciences) *In Progress*

Coursework: Data Structures & Algorithms, OOP, Databases, Operating Systems, Web Engineering, Software Engineering.

EXPERIENCE

Software Engineer & SEO Expert | Dollar Tech *Present*

- Design and develop full-stack web applications end-to-end front-end UI, back-end APIs, real-time dashboards, and database design.
- Own SEO across in-house properties: technical audits, on-page optimization, keyword research, schema, sitemaps, and Core Web Vitals.
- Ship features, resolve bugs, and manage production deployments; collaborate on product direction and growth.

LIVE PROJECTS

CPC Point — Premium global ad network for publishers cpcpoint.com

- Contribute to a live ad-tech platform serving 1,200+ publishers across 60+ countries with 50M+ verified impressions/month.
- Features include a real-time bidding auction (~40ms per impression), one-line embed tag, publisher & advertiser dashboards, transparent revenue ledger, and multi-method payouts (Bank, Wise, Payoneer, USDT).

The Dollar Tech — Free web-tools hub for bloggers, creators & SEOs thedollartech.tech

- Built and maintain a suite of no-signup browser tools: Query Finder (low-competition keyword research), Blog Outline Generator, Meta Tag & OG Preview, Ad Revenue (RPM) Estimator, Word Counter, Slug Generator, UTM Link Builder, Case Converter, and Percentage Calculator.
- Own site architecture, SEO structure, technical performance, and companion blog covering SEO and content growth.

Puns Now — Puns-niche content site with in-house generators punsnow.com

- WordPress-based content site with an SEO-first architecture, AdSense monetization, and interactive tools: Pun Generator, Name Pun Generator, Team Name Generator, Elf Name Generator, and Valentine's Cards Maker.
- Manage content strategy across food, animal, holiday, sports, and seasonal pun categories to drive organic traffic.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C++, PHP, HTML, CSS, SQL

Frameworks & Runtimes: React, Next.js, Node.js, Express, Tailwind CSS

CMS & Platforms: WordPress, Elementor, custom PHP/Node stacks

Databases: MySQL, PostgreSQL, MongoDB

Ad-Tech & Monetization: Real-time bidding concepts, ad-serving pipelines, Google AdSense, CPC/CPM/CPA campaign models, invalid-traffic handling

SEO & Analytics: Technical SEO, on-page optimization, keyword research, schema/structured data, Core Web Vitals, Google Search Console, Google Analytics, Ahrefs, SEMrush

Tools & DevOps: Git, GitHub, VS Code, Linux, cPanel, Vercel, Netlify

Core CS: Data Structures, Algorithms, OOP, REST APIs, System Design fundamentals

CORE STRENGTHS

- Full-stack engineer who also owns SEO, able to build products that both ship and rank.
- Comfortable operating live, revenue-generating systems: ad-tech, payouts, and monetized content.
- Product-minded end-to-end delivery from architecture through deployment and growth.
